

Air pollution – key assessments and resources

The European Environment Agency supports and informs **policy development** and **implementation** in the area of **air pollution**.

eea.europa.eu/air

AIR QUALITY - ASSESSMENTS		<p>Air quality in Europe – 2019 report</p> <p>EEA’s annual air quality report presents the overview and analysis of Europe’s air quality from 2000 to 2017. It also gives the latest findings and estimates of population and ecosystem exposure to the air pollutants with the greatest impacts.</p>	
		<p>Europe’s urban air quality</p> <p>This report presents the re-assessment of implementation challenges in achieving clean air. It analyses the implementation of EU air quality legislation at the urban level and identifies some of the reasons behind persistent air quality problems in Europe’s cities. It is produced in cooperation with 10 cities across Europe to support air policy implementation.</p>	
AIR POLLUTANT EMISSIONS		<p>EMEP/EEA air pollutant emission inventory guidebook – 2019</p> <p>Technical guidance to prepare national emission inventories. The joint EMEP/EEA air pollutant emission inventory guidebook provides expert guidance on how to compile an atmospheric emissions inventory. The Guidebook is published by the EEA with the CLRTAP Task Force on Emission Inventories and Projections responsible for the technical content of the chapters.</p>	
		<p>NEC Directive reporting status 2019</p> <p>This briefing presents progress made by the European Union (EU) and its Member States in meeting the 2010 emission ceilings that remain applicable until the end of 2019 under the Directive (EU) 2016/2284 on the reduction of national emissions of certain atmospheric pollutants (the National Emission Ceilings (NEC) Directive). In addition, it provides an assessment of the projected emissions reported by Member States for 2020 and 2030, in relation to the 2020 and 2030 reduction commitments for each country set in the Directive.</p>	

FURTHER RESOURCES		<p>CleanAir@School</p> <p>This is a citizen science initiative on air quality-EPA Network joint project, focussing on air quality around Europe’s schools. It also guides to air quality sensors that identifies new tools for assessing air quality.</p>	
		<p>Air quality and emission indicators</p> <p>The EEA publishes a variety of indicators (policy relevant short assessments based on data) relating to air pollution.</p>	
		<p>Air pollution country factsheets</p> <p>Key data on air pollution for each of the 33 EEA member countries and the EU-28. Indicators on past and future emission trends are presented, as well as a summary of the national air quality situation in each country.</p>	
		<p>Air pollution data sets and maps</p> <p>Access data and information relating to air pollution.</p>	
		<p>European Air Quality Portal</p> <p>Technical information and services for the reporting of official air quality information from EU Member States and other EEA member and co-operating countries.</p>	
EEA	 <p>Europe’s environment</p> <p>For more information on thematic and integrated assessments, data and indicators on Europe’s environment, visit our website.</p> <p>Audio-visuals and infographics: A number of communication products on climate change and other topics are available under the Media tab.</p>
