

**Guidance for the conversion of the amount of fuels to the energy content
(according to Annex 4, Part 1, point 3 c) of the Decree no. 191/2017 Coll.)**

Fuel quantities placed on market are converted to their lower-heat-value energy content pursuant to the energy densities set out in Annex 1 of the Decree no. 271/2011 Coll. as amended as the quantity of each type of fuel in litres or kilograms and its energy content per unit volume or weight. Quantities of fuels not listed in Annex 1 of the Decree are converted to their lower-heat-value energy content pursuant to energy densities set out in Appendix 1 to the Joint Research Centre-EUCAR-CONCAWE (JEC) Well-to-Tank report (version 4) of July 2013.

Appendix 1 to the Joint Research Centre-EUCAR-CONCAWE (JEC) Well-to-Tank report (version 4) of July 2013 is available in English at the following link:
